- **Github**: https://github.com/Ankit018348

Motivated and detail-oriented Computer Science student with a strong foundation in software development, data structures, and web technologies. Skilled in Java and modern frameworks such as React and Spring Boot. Experienced in academic and personal projects involving full-stack development. Eager to contribute to innovative software solutions and continuously enhance technical and problem-solving abilities.

Seeking opportunities to apply my skills in real-world environments and grow as a software engineer.

## TECHNICAL SKILLS

| | |
|---|---|
| **Programming Languages** | Java, JavaScript (ES6+), TypeScript, Python, C, C++ |
| **Web Technologies** | HTML5, CSS3, JSON |
| **Web Frameworks** | React.js, Tailwind CSS, Bootstrap CSS, Spring Boot,Node.js |
| **Database** | MySQL, MongoDB |
| **Version Control System** | Git, GitHub, Docker, Postman |
| **Soft Skills** | Critical thinking, Data-driven decision making, Communication, Presentation |

## EDUCATION

**MCKV Institute of Engineering**                                                    Aug 2022 - Present
Bachelors of Technology in Computer Science & Engineering
CGPA: 8.60 (upto 6$^{th}$ Sem)

**Radhika Town High School**                                                    April 2020 – Mar 2022
Higher Secondary
Percentage: 88.16%

## EXPERIENCE

**Web developer intern | Prodigy Infotech**                                          June 2025 - July 2025
- Completed a hands-on internship focused on front-end development using HTML, CSS, and JavaScript.
- Built responsive web apps: landing page, stopwatch, Tic-Tac-Toe, and weather app with API & geolocation.
- Applied modern UI techniques including glassmorphism, animated gradients, and component-based layouts.
- Gained experience in API integration, DOM manipulation, and received a Letter of Recommendation for excellence.
- Received a formal Letter of Recommendation for outstanding performance and professionalism

## PROJECTS

**Food Delivery Website**
- Designed and developed a responsive Food Web applications using React, JSX.
- implemented state management for seamless user experience.
- Integrated location services to display nearby restaurants.
- Designed a responsive UI ensuring smooth navigation across devices. Optimized API calls and data fetching for faster performance.
- Implemented filtering and sorting features for restaurant listings. Enhanced user experience with intuitive search and categorization.

**SmartRecycle – AI & Blockchain-enabled Waste Management Platform**
- Developed a full-stack web application that connects waste generators and recyclers through an AI-powered waste categorization system and reward-based tracking using blockchain.
- Engineered smart contracts to ensure transparency and traceability in waste transactions; integrated an ML model to auto-identify waste types from user input.
- Tech Stack: React (Vite), TailwindCSS, Spring Boot, Flask, Web3j (Ethereum).

## ACHIEVEMENTS

- Secured 2nd Position in the Trace.IT Coding Competition at MCKV Institute of Engineering, demonstrating strong problem- solving and programming skills.

## HOBBIES
